# IOP and Aqueous Chambers

Denise Goodwin, O.D., F.A.A.O.

1

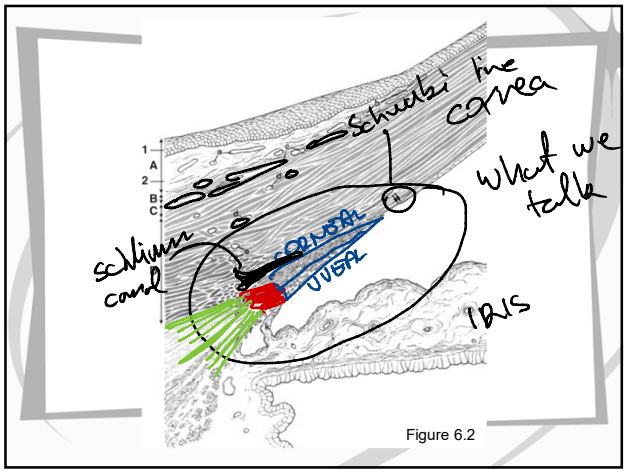

Figure 6.2

What we go over and talk about

Where the water is "traveling"

Schlemm canal → leave the schemm canal and goes thrany vessels but once NOT Schemm canal

2

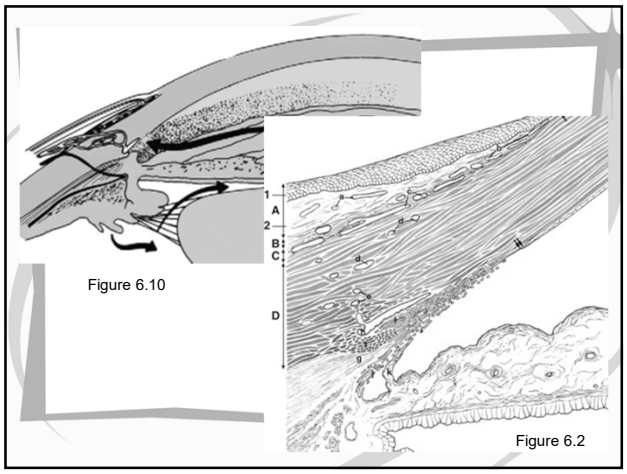

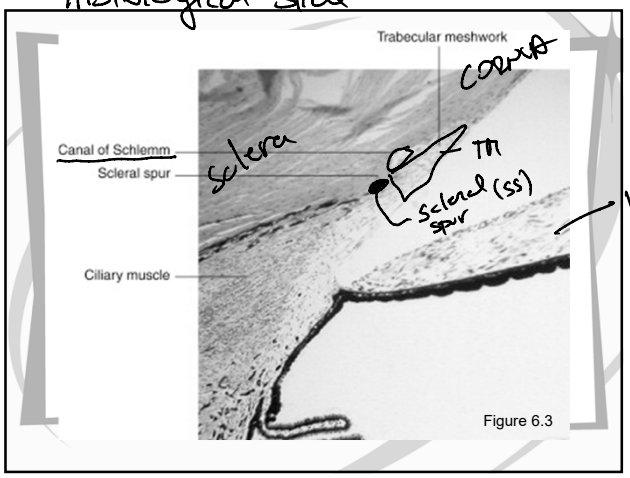

Figure 6.10

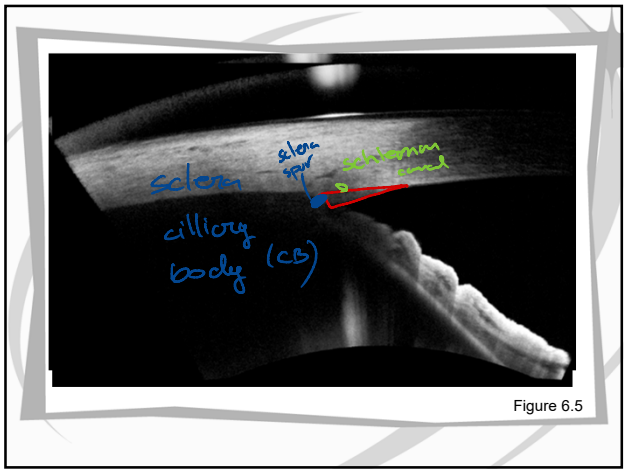

Figure 6.2

3

Histological slide

4

5

6

lens with the mirrow, so it reflex

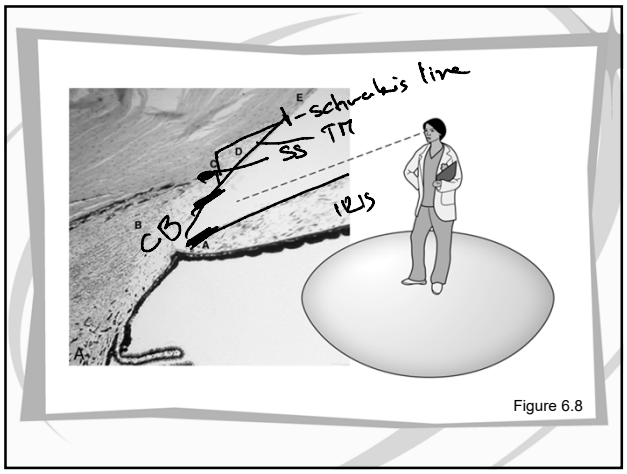

Figure 6.8

7

Once you find the pupil then you can follow out schemm canal we do not see

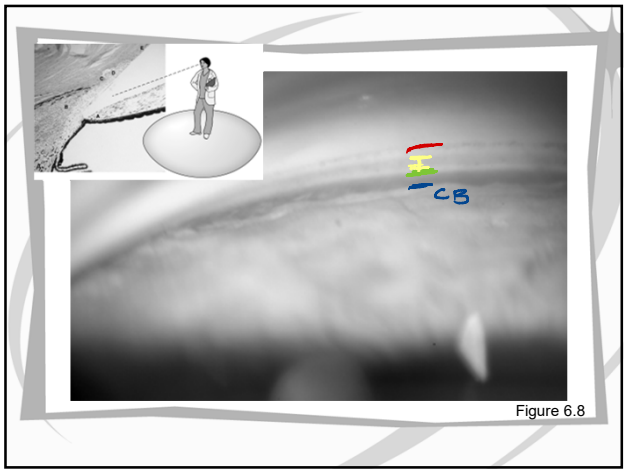

Figure 6.8

8

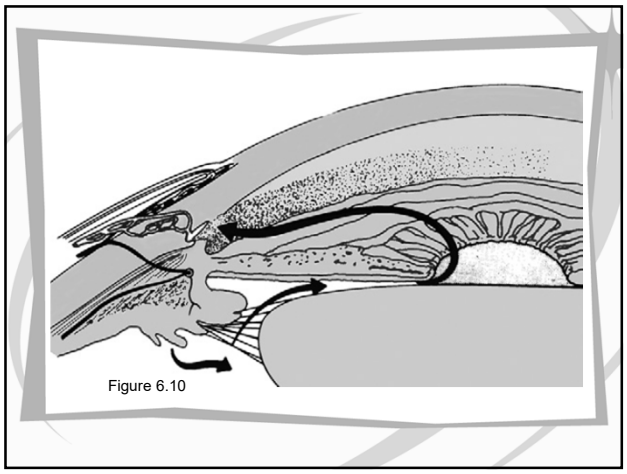

CB is darker than iris

white we see it is SCLERAL SPUR

trabecular meshwork

TM - has fluid in it. more posterior

schwalbi line - hard to see it
